FULWOOD'S *Frost-Proof* CABBAGE PLANTS

Ready September 1st to June 15th

EARLY JERSEY WAKEFIELD

This is a Cabbage that makes a head in 63 days and weighs about two pounds. The head is pointed.

CHARLESTON WAKEFIELD

A large pointed head, weighing three to four pounds and produces hard heads 73 days after plants are planted.

CHARLESTON WAKEFIELD

COPENHAGEN MARKET

A round head, weighing three to three and one-half pounds, produces headed Cabbage 70 days after plants are planted.

COPENHAGEN MARKET

GOLDEN ACRE

Somewhat like Copenhagen Market, size about the same but matures about one week earlier.

On account of labor shortage Cabbage seed have gone twice as high as they were last year, and, since we use only the very best seed grown by Ferry-Morse Seed Company, we have had to make a slight increase in our prices. In return we are giving you plants from the very best seed grown and you will be pleased with the results.

MARION MARKET

A wilt-resistant Copenhagen. Matures heads 70 days after plants are planted. Somewhat larger head than the Copenhagen, but same shape.

WISCONSIN ALL SEASON

Makes heads in 85 days, weighing 6 to 8 pounds. A good kraut and late variety.

200 Plants
74¢
Post-paid

EARLY FLAT DUTCH

Three weeks later than Jersey Wakefield. Heads weigh about 6 pounds. A good kraut variety.

GEORGIA BLUE STEM COLLARD PLANTS

Plant of the cabbage family, forms a cluster of tender, undulated leaves on a long stem; withstands heat and adverse soil conditions. Grown widely in the Southern States, and used as greens; of excellent quality when cooked.

Money saving postpaid plant collections will be found on next to the last page in this catalog.

Prices and Varieties of Frost-Proof Onion Plants on the back of this page.

FULWOOD'S GENUINE *Frost-Proof* ONION PLANTS

There is a very short crop of Onion seed. However, we secured seed of four good varieties, planting some three thousand pounds. In ordering, be sure to state if we can substitute another good variety if we should be out of the variety wanted. State first choice and second choice.

All seed is treated before planting and plants are sprayed during the growing period and thus you are assured of good, healthy, strong plants. Because they are grown in the open field and are subject to light frosts during the growing period, they are Genuine Frost-Proof plants and will stand temperatures as low as 18 to 20 degrees above zero without injury. Onions grown from Fulwood's Genuine Frost-Proof Onion plants are also an excellent money crop, as they can be marketed at least two weeks in advance of Onions grown from sets and way ahead of Onions grown from seed. Furthermore, my plants will make much better Onions than those grown from sets, the Onions being larger and they do not run to seed. They will also keep much better when cured and stored.

My Onion plants should be set out the same time as my Cabbage plants, and you can order them for shipment at the same time. My Onion plants are not to be confused with cheap Texas plants kept on storage. Order my fresh pulled plants for a bumper crop on Onions.

Varieties

CRYSTAL WAX BERMUDA

Probably the best selling Bermuda Onion on the market because of its exceptionally attractive appearance. It has the same general appearance as the Yellow Bermuda except that it is crystal white and waxy. Because of its sweet, mild flavor, like the Yellow Bermuda, this is an excellent eating Onion.

SOUTHPORT WHITE GLOBE

The best of the white varieties. Bulbs round, medium sized, solid, pure white, very attractive; skin thin and delicate; flesh waxy white, fine grained, and mild. Keeps well in fall storage.

SOUTHPORT YELLOW GLOBE

Brigham Strain—Specially desirable on account of its good keeping qualities. Bulbs globular, solid, well covered with tight fitting skins; foliage dark green; partially resistant to aphids.

YELLOW BERMUDA

This is the most widely grown of all Bermuda Onions. No sweeter Onion is grown than this, and it always has a ready market and is a large producer and a real money-maker. Whether grown for marketing or for your own table use, you can make no mistake in ordering this variety.

Acres of tomato plants ready for shipping

TOMATO PLANTS

Ready April 1st to June 15th

My Tomato Plants are certified by the State of Georgia. They are grown on new land from Certified seed. I grow each season four hundred acres of Tomato Plants. These plants are grown in the open field and when shipped are 8 to 10 inches tall, they are field hardened, stocky and well-rooted. Each bundle of 100 is wrapped with paper to hold the damp moss to the roots. They are then packed in special crates or hampers and shipped by express. They will keep in good condition six to ten days. These plants are not frost-proof and should not be planted until danger of frost is over. The fact that the seed are planted here in February and March gives the plants a chance to be acclimated and toughened by outside temperatures and when set further North will start growing quickly and produce rich, red, ripe Tomatoes three weeks before home grown or hot house plants. I ship these plants to every part of the United States. Have been shipping large quantities to market gardeners and truckers for thirty-three years. Van Camp Packing Co., of Indianapolis, Ind., uses ten million of my Tomato Plants every season. Send me your order for some of these fine plants; you will be more than pleased with the early profitable crop you will produce.

DESCRIPTION OF VARIETIES OF TOMATO PLANTS

GREATER BALTIMORE is similar to the Stone, heavily productive and very valuable for canning. Fruits are scarlet-red, large, commonly weigh six ounces; deep but flat; smooth, very firm and solid.

MARGLOBE is a splendid type for earliness and uniformity; particularly valuable for shipping; definite disease-resistance recommends this type for use in sections infested with Fusarium Wilt and Nail-head Rust. Plants thrifty and heavily productive, of long bearing period. Fruits uniform deep scar-

let; large; uniformly globe shaped; smooth, solid and of distinct quality.

PRITCHARD (SCARLET TOPPER) is a very promising, heavily productive wilt-resistant variety for home and market garden, shipping and canning. Fruit large, globe shaped, scarlet and well colored about the stem end; flesh firm and of fine quality.

RUTGERS is highly recommended as a second early maturing variety for canning and Tomato juice. Fruits are of medium to large size, similar in shape to Marglobe, but slightly more flattened.

FULWOOD'S PEPPER PLANTS

Not Frost-Proof. Ready April 1st to June 15th.

California Wonder Variety—This is an outstanding medium large variety for market garden and shipping. Plants vigorous, prolific. Fruits 4-lobed, chunky; very attractive, smooth, uniform and deep green, changing to bright crimson; flesh thicker than any other variety, sweet and mild.

Pimento Variety—Pre-eminently a canning variety; good also for home and market garden planting. Plants large, erect, prolific. Fruits heart-shaped, very smooth; color dark green, changing to bright crimson; flesh exceptionally thick, sweet and mild.

Southerners who know their Yams will appreciate this Porto Rico as the finest ever. People in the East and Middle West who know Sweet Potatoes only as being small, dry and yellow have a real treat in store for them if they will try this luscious variety. My Porto Rico always has a deep rich red meat that is especially sweet and tasty. It is two to three weeks earlier than most yams and is an enormous yielder and keeps especially well. Northern markets and curing houses pay top prices for this variety.

FULWOOD'S GENUINE FROST-PROOF CABBAGE PLANTS

● Vegetables sold early in the season bring many times the price of those marketed several weeks later, Fulwood's Genuine Frost-proof plants produce from two to three weeks before home-grown plants—and that's why they are real money-makers for the buyer.

● Here at Tifton, Georgia, where my plantation is located, the soil and climatic conditions are ideally suited for growing tough, hardy, healthy plants in the open field during the winter and early spring. The plants make a slow but steady growth and when eight or ten weeks old they are extremely tough and hardy. In this condition they can be shipped to territory farther north and be planted in the open fields there a month or six weeks earlier than home-grown, hot-bed, or cold frame plants.

● These Frost-Proof plants will stand temperatures of 18 to 20 degrees above zero without injury. Freezing of the soil or covering of the plants with ice, sleet or snow after they have been planted will not injure them unless the temperature gets below 18 to 20 degrees.

● Because my plants are so strong and healthy, and because they can safely be planted considerably in advance of home-grown plants, is the reason for their being able to make large, extra early crop—all ready for market during the time prices are high.

All plants listed in this catalog are grown in the open field and will produce vegetables three weeks before your home-grown plants or hot house plants. Plant your garden with Fulwood's fine Field Grown Plants.

Pepper	California Wonder	Frost Kills	3'	24"	50	15,000

PLANTING NOTES: When plants arrive, if your ground is not in condition to plant right away, take the plants out of the crate, cut the bands, spread out and place the roots in soft mud. In planting, pack soil well around the roots, pouring water in the hole after the plants are set out. Throw loose dirt around the plants after watering to keep the wet soil from drying out. Use chart above for proper spacing.

HOW THE WAR AFFECTS VEGETABLE PLANTS

The seed we use are twice as high to four times as high as seed were before the war.

Crates, moss, wrapping paper, twine, fertilizer, every item used in producing Plants have gone up.

Labor is twice as high as before the war, hard to get, and not as experienced as it used to be. Regardless of advances in everything used in growing good Vegetable Plants, the price of Plants have advanced very little.

This year, 1943, there is a shortage of tin and you won't be able to get canned goods from the stores as formerly. It is more important than ever before that every United States citizen do their part by planting a Victory Garden for defense of your country and home.

Mail and express will be some slower on account of the huge loads the railroads are carrying. Place your orders as early as possible. Read your order over carefully, and be sure you have sent the right amount for the number of plants wanted. Write your name and address plainly, so that your plants will not be delayed in transit.

TESTIMONIAL LETTERS

My order of Pepper, Eggplants and Brussels Sprouts arrived looking fine. The order of Cabbage also looked good. I believe these are the nicest plants I've ever had from you.—Mrs. H. C. Wilson, Deposit, N. Y.

I received Tomato Plants and your card and am very well pleased with plants; also the packing was very good. I thank you and hope to remain yours as a customer.—Ed. Portzer, St. Marys, Pa.

My Cabbage Plants arrived June 5 in very good shape. Thanking you, I remain your customer.—U. S. Walker, Montesano, Wash.

Your second shipment of Tomato Plants arrived in good condition and they are doing fine. Thank you very much, and next year you will have my orders.—Henry Ruff, Bel Air, Md.

Tomato Plants arrived May 8 in perfect condition. They are especially nice this year, and I thank you.—Mrs. A. F. Worthley, Sherburn, Minn.

Received Tomato, Pepper and Eggplants this P. M. They are simply fine and completely satisfactory.—John B. Booker, Morton, Pa.

Received my Tomato Plants in good condition. Many thanks.—Mrs. W. F. Bettis, Earl, N. C.

I am enclosing my picture picking your Tomatoes on October 31, 1941, in the first snow of the season. I picked 40 bushels and wrapped them and had them until January 1, 1942. I had over 125 bushels of Tomatoes I made on the 500 Marglobe plants I purchased from you last year. Your plants are healthy and did well, and I would advise anyone who wants good plants to purchase them from you.—Obed L. Slatery, Leedey, Okla.

Our plants arrived Saturday, the 18th, in good condition. Plants are getting firm hold and look good, although we had such hot middle day and cold nights. They sure can stand changes fine. Wishing you a prosperous Spring.—Mrs. P. Genschow, Chester, Va.

Play Safe With Fulwood's

Guarantee

I guarantee all of my plants to be exactly as described in this catalog. Fresh pulled day order is received (where weather will permit). Plants pulled one at the time, counted and packed to carry to your home in good condition. Any plants arriving in bad condition will be reshipped at once, provided you notify me within five days. When you purchase Fulwood's plants you will receive full count, no runts, no diseased plants, and you will receive the exact varieties ordered.

I send you only the highest quality plants and gladly stand back of them. However, weather, soil, and care also influence crops, so in no case shall I be responsible for any amount beyond the purchase price.

P. D. Fulwood
